

Decision Making in Medical Crisis

Your decision matters in medical crisis and emergency situations...

Goals of the Course:

In crisis situations, clinicians are required to make time-pressured decisions under high uncertainty and with shifting goals. This Course introduces participants to pitfalls in decision making and factors affecting the thinking process under such conditions.

Target Participants:

Healthcare professionals who want to learn decision making skills in both medical crisis and everyday emergency situations.

Training Format:

Active participation and deep reflection through interactive lectures, games, simulation and debriefing.

Faculty:

Expert faculty experienced in medical emergencies and simulation-based learning.

Date: 30 June 2018 (Saturday)
Time: 0900 – 1700
Venue: HKJC Innovative Learning Centre for Medicine (ILCM)
7/F, HKAM Jockey Club Building,
99 Wong Chuk Hang Road,
Aberdeen, Hong Kong
